Subject Index (Vol. 8)

Acute liver disease, level of methionine enkephalin in plasma and in bile and urine, 53
Alcoholic liver disease, assay of haem synthesis enzymes in liver biopsies, 86
—, changes in liver and spleen volumes, 150
—, normal Kupffer cell number but reduced lysozyme content, 173
Alveolar echinococcosis, 373
Amino acid profile alteration, after splenorenal shunt blockage, 325
Amphotericin B, effects on excretory function and coloid clearance capacity of perfused rat liver, 344
Anti-interferon antibodies, development of, clinical impact, 351
Anti-viral combination therapy, effect on hepatitis B-associated glomerulonephritis, 367
Anti-viral treatment, histological improvement of HBV infection, 218
Antigens, in the proliferated bile ductules, 330
Arterial hypertension, ameliorated by portal hypertension, 294
Ascites, resistant, and hepatic vein webs, 287

Bacteriuria, and primary biliary cirrhosis, 201
Bile duct ligation, historadiographic localization of taurocholate, 181
Bile formation, hydrodynamics, 13
Bile salt, hydrodynamics of bile formation, 13
Biliary tree, intrahepatic, blood group antigens, 330
β-Blockade, and renal function in cirrhosis with ascites, 279

C-gene-encoded proteins, in liver and sera of HBV-infected patients, 77
C/Pol fusion protein, synthesis, during chronic HBV infection, 77
Carbohydrate antigens, relation to *N*-acetyllactosamine, 330
Chemotherapy, possible cause of susceptibility to HBV, 232
Cholesterol nucleation time, prolonging effect of low-dose ursodeoxycholic acid, 1
Cirrhosis, effect of improvement of sinusoidal stenosis, 60
—, effects of isosorbide dinitrate, 316
—, effects of verapamil, 302
—, glucose and insulin metabolism, 107
—, induced by dimethylnitrosamine, early events, 42
—, renal function and effective β-blockade, 279
Colchicine, prevention of D-galactosamine-induced hepatitis, 165
Colloid clearance capacity, perfused rat liver, effect of amphotericin B, 344
Core gene products, detection in sera and liver of HBV-infected individuals, 77
Cytoskeleton, hepatocytic, structure and functions, 380

Delta hepatitis, synthesis of interleukin-2, interleukin-2 receptor and γ-interferon, 358
Dimethylnitrosamine-induced cirrhosis, evidence for an immunological mechanism, 42
Drug hepatotoxicity, and genetically determined oxidation polymorphism, 158

Encephalopathy, reversal after splenorenal shunt blockage, 325
—, treatment with lactitol and lactulose, 208
Epithelioid hemangioendothelioma, following contact with vinyl chloride, 99
—, recurrence after orthotopic liver transplantation, 99
Excretory function, perfused rat liver, effect of amphotericin B, 344

Fibronectin, plasma, increased levels associated with portal diversion, 67
Fibrosis, development associated with immune-mediated responses to liver injury, 42

D-Galactosamine-induced hepatitis, prevented by colchicine, 165
Gallstone recurrence, post-dissolution, effect of low-dose ursodeoxycholic acid, 1
Gastric mucosa, in portal hypertension, 267
Genetics, drug hepatotoxicity, 158
Glomerulonephritis, hepatitis B-associated, improvement after antiviral combination therapy, 367
Glucose, homeostasis in cirrhotic patients, 107
Glutamine synthetase, ratio to γ-glutamyltransferase, 338
γ-Glutamyltransferase, ratio to glutamine synthetase, 338
γ-Glutamyltransferase activity, with normal serum γ-GT in progressive idiopathic cholestasis, 22

H_2 blocking agents, effect on hepatocyte proliferation, 32
Haem synthesis enzymes, specific and total activities in alcoholic liver disease, 86
HBsAg carriers, hepatitis B-infected children, 226
Hepatitis B, A, non-A, non-B (Conference report), 254
—, associated with glomerulonephritis, improvements after antiviral combination therapy, 367
—, chronic, children of HBsAg carrier mothers, 226
—, —, histological improvements after anti-viral treatment, 218
—, DNA status, in tumorous and non-tumorous liver tissue, 249
—, DNA, in hepatocellular carcinoma, 249
—, protracted, acute, treated with recombinant α-A-interferon, 73
—, vaccine, immune response to booster injection, 236
Hepatitis B carrier children, vulnerability to 'horizontal' transmission, 226
Hepatobiliary secretion of bile products, 181
Hepatocellular carcinoma, accompanied by liver cell dysplasia, 241
—, normal adjacent liver, 249
Hepatocyte cytoskeleton, structure and functions, 380
Hepatocyte heterogenity, mediation of hepatic response, 259

0168-8278/89/$03.50 © 1989 Elsevier Science Publishers B.V. (Biomedical Division)

Hepatocyte proliferation, effect of H_2 blocking agents and omeprazole, 32
Hyperdynamic state, arterial hypertension model as an investigative aid, 294
Hypertransaminasemia, reduction of ALT and γ-GT serum levels by ursodeoxycholic acid, 7

Immune response, hepatitis B vaccine booster, 236
Insulin secretion and action in cirrhotic patients, 107
α-A-Interferon, recombinant, as treatment for protracted acute type B hepatitis, 73
—, therapy, comparison of responses of protracted and chronic type B hepatitis, 73
Interferon antibodies, development during treatment with recombinant interferon for HBV infection, 351
Interleukin-2, interleukin-2 receptor and γ-interferon, synthesis during chronic HDV infection, 358
Isosorbide dinitrate, systemic and regional hemodynamic effects in liver cirrhosis and portal hypertension, 316

Kupffer cells, in alcoholic liver disease, 173
—, normal number but reduced lysozyme content, 173

Lactitol and lactulose, treatment for subclinical encephalopathy, 208
Lactulose, randomised cross-over comparison with lactitol, 208
Leukemia, acute, children, hepatitis B recurrence, 232
Lipoperoxidation, possible role in galactosamine-induced liver damage, 165
Liver and spleen volumes, changes in alcoholic liver disease, 150
Liver biopsy complication, monitored by ultrasound, 94
Liver cell dysplasia, accompanying hepatocellular carcinoma, 241
Liver fibrosis, clinical utility in practice, 115
—, cell-matrix interactions, 115
Liver function impairment, central role of liver fibrosis and extracellular matrix, 115
Liver transplantation, auxiliary, in jaundiced rats with UDP-glucuronyltransferase deficiency and defective hepatobiliary transport, 192
—, treatment for epithelioid hemangioendothelioma, 99

Macronodular cirrhosis, relationship to dysplasia, 241
Metabolism, regulation by extracellular nucleotides and eicosanoids, 259
Methionine enkephalin, excretion, in bile and urine, 53
—, increased in plasma in acute liver disease, 53

Nucleotides and eicosanoids, regulation of hepatic metabolism, 259

Oxidation polymorphism, genetically determined, 158

Peribiliary vascular plexus, morphologic alterations in liver disease with portal hypertension, 139
Peripheral blood mononuclear cells, in HDV infection, 358
Portal diversion, effect on reticuloendothelial function and plasma fibronectin levels, 67
Portal hypertension, amelioration of arterial hypertension in spontaneously hypertensive rats, 294
—, effects of isosorbide dinitrate, 316
—, gastric mucosa, 267
—, increase of peribiliary vascular plexus, 139
—, significance of sinusoidal stenosis, 60
—, treated with vasopressin and vasopressin plus nitroglycerin, 308
Primary biliary cirrhosis, and bacteriuria, 201
Progressive idiopathic cholestasis, high liver and normal serum γ-glutamyltransferase activity, 22

Recombinant interferon, development of interferon antibodies during treatment of HBV, 351
Recurrence of hepatitis B, children, response to chemotherapy, 232
Renal function, and effective β-blockade in cirrhosis with ascites, 279
Reticuloendothelial system, effect of portal diversion, 67
Retinoids, reduced store in alcoholic liver disease, 26
—, wide variation in level in patients with alcoholic liver disease, 26
Retinyl esters, changed acyl pattern through alcohol consumption, 26

Serum bilirubin level, after auxiliary liver transplantation, 192
Sinusoidal stenosis, significance in vascular resistance and portal hypertension of liver cirrhosis, 60
Splanchnic oxygen uptake, 387
Spleen and liver volumes, comparison in alcoholic and nonalcoholic liver disease, 150
Splenorenal shunt blockage, in association with encephalopathy reversal and amino acid profile alteration, 325

Taurocholate, increases in biliary permeability and effects of biliary tree, 13
—, rat liver, historadiographic localization after bile duct ligation, 181

Ultrasound, as an aid to monitoring liver biopsy complications, 94
Ursodeoxycholic acid, prolongs cholesterol nucleation time in gallbladder bile of patients with cholesterol gallstones, 1
—, treatment, effect on levels of alanine aminotransferase and γ-glutamyltranspeptidase in hypertransaminasemia, 7

Vaccine for hepatitis B, necessity for booster in healthy responders, 236
Vascular plexus around intrahepatic bile ducts, normal livers and portal hypertension, 139
Vascular resistance, 387
Vascular tumours of the liver, update, 125
Vasopressin, plus nitroglycerin, effect on portal hypertension, 308
—, effect on portal hypertension, 308
Vein webs, hepatic, and resistant ascites, 287
Verapamil, effect in alcoholic cirrhosis, 302
—, effect on porto-hepatic pressure gradient and hepatic function, 302
Vinyl chloride, in association with epithelioid hemangioendothelioma, 99
